

Power LogOn® Adds Card-Based, Multi-Factor Authentication to Microsoft Azure Logon, Plus Password Management for All Other Logons

MICROSOFT AZURE ISV PROFILE: Access Smart®

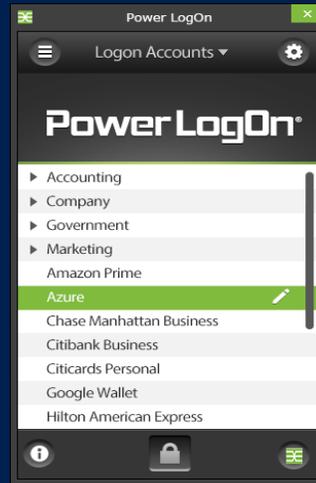

Extend data security from employee fingertips to data storage. Employees no longer have to remember, type, or manage their passwords. IT has the ability to implement long, security-enhanced passwords that can be changed frequently. Power LogOn serves small- to medium-sized businesses, large corporations, hospitals, universities, and government agencies.

WHAT WE OFFER

Cybersecurity starts when your employee first logs onto their computer. In today's environment of increasingly sophisticated cyber-attacks, businesses, agencies, and institutions require proactive security solutions and convenience to protect their computer systems and data from hackers.

Power LogOn's multi-factor authentication adds an extra layer of cybersecurity for computers, applications, websites, networks, and clouds logons. The combination of Azure and Power LogOn offers an efficient cloud solution that safeguards data from fingertips to storage.

You can implement long, unique, complex passwords that can change frequently without user involvement. Power LogOn and Azure meet a broad set of international and industry-specific compliance standards, such as FIPS 140-2, HIPAA, CJIS, and many others.

To keep the cost of ownership low, you can combine cyber access with physical access for a single employee ID badge solution.

WHAT OUR CUSTOMERS ARE SAYING

"As an Ophthalmologist my biggest fear is a security breach of my EMR data. Power LogOn has allowed me to quickly and securely log on to Windows and my EMR software. This is a must have product." – Dr. Kalin, MD, Kalin Eye Exam

To learn more about how you can protect your networks and data, visit our website at www.access-smart.com.

Microsoft Azure

Microsoft Azure is an open and flexible cloud platform that enables you to quickly build, deploy, scale, and manage applications across a global network of Microsoft data centers. You can build applications using multiple languages, tools, and frameworks.

KEY USE CASES

WEB APPLICATIONS

Build anything from lightweight websites to multi-tier cloud services that scale up as your traffic grows.

CLOUD STORAGE

Rely on geo-redundant cloud storage for backup, archiving, and disaster recovery.

BIG DATA & HPC

Get actionable insights from your data by taking advantage of a fully compatible enterprise-ready Hadoop service.

MOBILE

Accelerate your mobile app development by using a backend hosted in Microsoft Azure. Scale instantly as your install base grows.

MEDIA

Create, manage, and distribute media in the cloud – everything from encoding to content protection to streaming and analytics support.

FLEXIBLE APPLICATION MODEL

Microsoft Azure provides a rich set of application services, including SDKs, caching, messaging, and identity. You can write applications in .NET, PHP, Java, node.js, Python, Ruby, or using open REST protocols. This is all part of Microsoft's promise to let you build using any language, tool, or framework.

ALWAYS ON, ALWAYS HERE

Build resilient applications with automatic operating system and service updating, built-in network load balancing, and geo-redundant storage. Microsoft Azure also proudly delivers a 99.95% monthly SLA. You can rely on decades of experience in data center operations and trust that everything Microsoft Azure offers is backed by industry certifications for security and compliance.

DATA CENTER WITHOUT BOUNDARIES

Microsoft Azure makes it easy for you to integrate your on-premises IT environment with the public cloud. Migrate your virtual machines to Microsoft Azure without the need to convert them to a different format. Use the robust messaging and networking capabilities in Microsoft Azure to deliver hybrid solutions, and then manage your hybrid applications from a single console with Microsoft System Center.

GLOBAL REACH

With data centers around the globe, a massive investment in data center innovation, and a worldwide Content Delivery Network, you can build applications that provide the best experience for users, wherever they are.
