# FIGHTING CYBERCRIME – ACCESS SMART PARTNERS WITH CARDLOGIX TO OFFER HOLISTIC IDENTITY MANAGEMENT SOLUTIONS

LADERA RANCH, Calif., April 24, 2018 — Access Smart LLC, provider of innovative Multi-Factor Authentication (MFA) and cyber (logical) access security control systems, announces a partnership with CardLogix, a leading smart card manufacturer and authorized reseller of Access Smart's Power LogOn® System.

The companies share a common goal to help reduce the hacking epidemic by fighting cyber security head-on with holistic identity solutions that discourage perpetrators from all angles. Taking a customer-centric approach, the companies will provide NIST-level security solutions that meet the clients' needs, budgets, and specific environments. CardLogix adds value to Power LogOn® with Secure Element (SE) technology that can be programmed for multiple applications.

The Access Smart and CardLogix partnership offers smart cards, card operating systems, biometrics, chip encoding software, authentication, encryption, development tools, and middleware with an authentication and cyber access control solution that enables fast and hassle-free deployment. Power LogOn was purpose-built to fit onto existing security infrastructure.

"Our technology resellers are a cornerstone of our success, and we're thrilled to join with CardLogix to provide their customers with an expanded set of security tools that are both robust and affordable," said Dovell Bonnett, Founder & CEO, at Access Smart. "Together we're helping agencies, companies and institutions safeguard their data with Access Smart's cyber identity management features, such as Multi-Factor Authentication and enterprise password management. CardLogix's SE technology support further ensures the protection of confidential data, while offering fast, hassle-free deployment for their customers."

CardLogix selected Power LogOn because the company needed a proven authentication tool for cyber access that was flexible and could act as the first line of defense from security intrusions.

"This partnership with Access Smart allows us to present an easily integrated solution that is

unparalleled in the marketplace,” said Sebastien Goulet, President & CEO of CardLogix. “We’re very excited to offer secure authorization and access controls for physical environments or devices in a package that do not forfeit security for convenience. Their solutions are powerful, flexible, and greatly reduce the impacts of the cybersecurity problem.”
